

FILIPPO ALOTTA

Software Engineer

alottafilippo@gmail.com | +39 3280855507 | Via Sestio Calvino, 00174, Rome | [Portfolio](#)

SUMMARY

I am a software engineer specializing in TypeScript and Next.js. I currently work full-time on web projects, managing user interface development for enterprise dashboards. In parallel, I am studying Electronic Engineering at Roma Tre University: a path I chose to build solid architectural foundations for my practical work. I bring to development teams the pragmatism acquired in the field and the analytical rigor derived from my engineering studies.

WORK EXPERIENCE

Software Engineer, SwipeApp Studio

Oct 2024 – Present

I work on developing software solutions for enterprise clients. I collaborate daily with the team to develop and improve the product, utilizing modern patterns to build interactive dashboards. I work iteratively, with frequent releases and rapid feedback.

Software Engineer, Wheelo

Oct 2024 – Present

I oversee the web development of Wheelo, a platform designed to manage itineraries, communities, and useful services. I am responsible for creating the interface and user experience, working to make the platform fast, intuitive, and functional.

Web Developer, Freelance

Dec 2023 – Sep 2024

During this experience, I primarily focused on developing websites and web applications using React, from initial setup to deployment. I worked on responsive layouts, integrated dynamic components, and optimized performance and SEO.

EDUCATION

Bachelor's Degree in Electronic Engineering | Roma Tre University

Sep 2025 – PRESENT

Focusing on digital systems, circuit design, and analytical problem-solving to develop a comprehensive understanding of computing architectures from the ground up.

Web Development Course | Start2Impact

May 2023 – Dec 2023

Comprehensive hands-on training program focused on modern web technologies. Acquired practical experience in building responsive web applications, working with APIs, and utilizing JavaScript frameworks.

SKILLS

- C
- TypeScript
- Next.js
- Tailwind
- Git
- Supabase
- Zustand
- CI/CD
- RESTful APIs

LANGUAGES

- English – B2
- Italian – Native
